THE ART HAUS CULTURAL VENUE

BRAND GUIDE-LINES

The Camp Greene identity: how The Art Haus looks, sounds and shows up.

HISTORIC CAMP GREENE · CHARLOTTE, NORTH CAROLINA

THE IDEA

A legacy, *not a proposal.*

The Art Haus is a historic building in Historic Camp Greene becoming a home for art, culture and community. Everything we make should feel like walking through its front door: warm, unhurried, proud of its history and open to everyone.

WE ARE

Elegant · Timeless · Sophisticated · Historic · Modern · Hopeful · Authentic · Community-centered · Inspirational · Premium

EVERY PAGE ANSWERS ONE QUESTION

Why does it matter?

The story, the place, the people.

Why believe in it?

Leadership, momentum, a plan.

How can I join?

Clear paths to partner, invest, advocate.

ALWAYS

- Lead with Historic Camp Greene and the community.
- Let white space do the work. Less text, bigger type.
- Photography feels real and warm, never staged.
- Graphics simplify, they never overwhelm.

COLOR

Forest, ivory, *brass.*

Forest green and ivory carry the page. Brass is the highlight. Clay is the single warm accent. Sage supports data and quiet panels. Heart-pine wood is a rare natural tone.

Ivory	Forest	Brass	Clay	Sage	Wood
#F5EFE0	#17382A	#C9A24B	#C4572F	#CBD5C0	#8A5A3B
RGB 245 239 224	RGB 23 56 42	RGB 201 162 75	RGB 196 87 47	RGB 203 213 192	RGB 138 90 59
Paper, backgrounds	Headlines, dark pages	Highlights, rules	One accent word	Data panels	Rare

GOOD PAIRINGS

TEXT	ON	USE FOR
Forest	Ivory or paper	Body text, headlines (the default)
Ivory	Forest	Section dividers, closing pages
Brass	Forest	Labels, one highlighted word on dark
Clay	Ivory	One italic accent word per headline, small labels
Forest	Brass or sage	Quote blocks, data tiles

DO

Keep a third of every page empty ivory. Use brass once per page for emphasis.

DON'T

Put brass or clay text on ivory at small sizes, or add colors outside this palette.

TYPOGRAPHY

Three voices, *no more.*

SYNE EXTRABOLD · THE HEADLINE

THE ART HAUS

Wide, confident capitals. **Use for:** cover titles, section titles, big numbers, small caps labels (Syne Bold, 8–11 pt, spaced out). **How:** always uppercase; two lines at most.

FRAUNCES LIGHT + ITALIC · THE VOICE

Every legacy begins with a *vision.*

Use for: chapter titles, quotes, signatures, short statements. **How:** Light weight, never bold. Set exactly one phrase per headline in italic, in clay (or brass on dark).

ARCHIVO REGULAR · THE TEXT

The Art Haus was never intended to be simply another venue. It was envisioned as a place where creativity is celebrated, history is preserved, and communities come together.

Use for: body copy, captions, tables. **How:** Regular for text, Medium or SemiBold for emphasis, never italic.

WHERE TO GET THEM

Google Slides, Docs and Sheets already include all three. For PowerPoint, Word or Canva, download **Syne**, **Fraunces** and **Archivo** free from fonts.google.com, then double-click each file and choose Install.

TYPE IN USE

Sizes *and rules.*

ROLE	FONT	PRINT	SLIDES
Cover title	Syne ExtraBold, caps	110–170 pt	44–54 pt
Section title	Syne ExtraBold, caps	48–64 pt	32–40 pt
Chapter / slide title	Fraunces Light	64–84 pt	28–36 pt
Pull quote	Fraunces Light Italic	26–32 pt	18–24 pt
Body	Archivo Regular	9–10 pt	14–16 pt (never below 12)
Label	Syne Bold, caps, spaced	6.5–8 pt	10–12 pt
Big number	Fraunces Light or Syne	60–200 pt	28–60 pt

THE RULES

- One italic clay (or brass) phrase per headline. Not two.
- Headlines can be big enough to touch a photograph, but nothing may cover text. Text always sits on a solid shape or clear space.
- Short lines: 40–46 characters for body copy. Left aligned, never justified.
- Quotes and statements: sentence case, ending in a period.
- Numbers that are estimates carry an asterisk and a footnote that says *projected*.

JOIN US.

Every partnership leaves a legacy.

A place with *purpose.*

Sample headline and text together.

SIGNATURE SHAPES

Arches *and squares.*

THE ARCH

Portraits and people photographs are cut to an arch: a doorway, a window. Flat edge at the bottom, standing on the page. Use it once or twice per page or slide.

THE SQUARE BLOCK

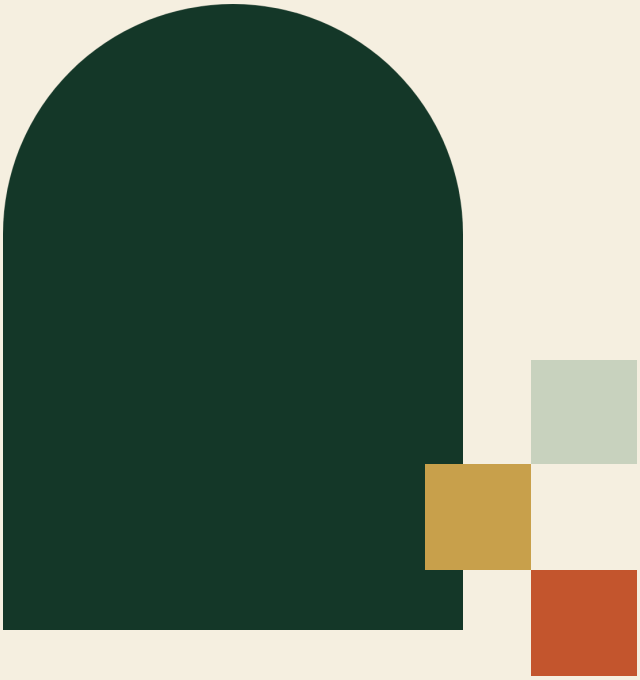

Small color squares step diagonally across a photo or page corner. One size per page. Three or four at most, in brass, clay, sage and forest.

THE MARKER HIGHLIGHT

One key phrase per page is highlighted in brass, like a hand-drawn marker: restoring possibilities.

THE BRASS HAIRLINE

A short brass rule (about one inch) opens a new idea under a title or above a label.

Every legacy begins with a *vision.*

DO

Keep squares the same size on a page. Use the arch for people and place.

DON'T

Stretch the arch, use rounded boxes, drop shadows, gradients or more than one highlight per page.

PHOTOGRAPHY

Warm, *real, local.*

Full color, warm. The default.

Forest duotone for section dividers.

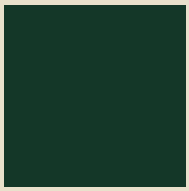

Arch crop for people.

- **Show people.** Families, artists, neighbors, hands, conversation. Candid and lifestyle, not corporate.
- **Show the place.** Historic Camp Greene, the building, brickwork, markers, street life.
- **Keep warmth.** Don't cool, flatten or heavily filter photographs. The one exception is the forest duotone on dividers.
- **No text baked into images.** Captions and logos live in the layout, so they can be edited. Crop out generator watermarks.
- **Renderings are placeholders.** Replace with professional photography as it becomes available.
- **Face the content.** People in a photo should look toward the text, not off the page.

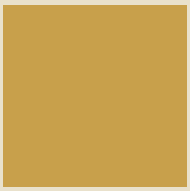

ELEMENTS LIBRARY

Drop these *on anything.*

Each file is a transparent PNG in the **elements** folder. In Google Slides: Insert → Image → Upload from computer. In PowerPoint, Word or Canva: drag the file onto the page. Resize from a corner so it stays square.
